

**COMO AUDIO INTRODUCES SPEAKEASY – GREAT SOUNDING
MULTI-ROOM Wi-Fi MUSIC SYSTEM
WITH THE GOOGLE ASSISTANT BUILT-IN**

Boston, MA -- For those who want the pleasure of listening to great sounding music, using voice commands for enjoying entertainment, controlling compatible devices around the home, planning a day and managing tasks, [Como Audio](#) introduces SpeakEasy as its newest high-fidelity music system by Tom DeVesto. SpeakEasy with the Google Assistant built-in works in concert with a beautifully designed audio device, featuring the room-filling sound quality of Como Audio in a multi-room system. Existing Como Audio customers can connect their current models to SpeakEasy with Google Chromecast Audio devices to group all the units to play music together.

The new SpeakEasy with the Google Assistant built-in allows music lovers to use voice commands for playing music “Hey Google, play jazz in the kitchen” or “What’s the weather today?” or “Turn up the thermostat 5 degrees” or “Dim the lights.” This is all done through the free Google Home app for iOS and Android.

“As with other Como Audio devices, I want to fill a void in the marketplace and create a product that not only includes all of the great advantages that the Google Assistant has to offer, but is coupled with a beautifully designed, great sounding music box,” says Tom DeVesto, Founder and CEO of Como Audio. “Designed as a multi-room audio system, listening to great sounding music from a plethora of sources just became sweeter and so much more.”

SpeakEasy is available in a furniture-grade wood veneer cabinet in a walnut, hickory, piano black, or piano white finish. It comes with actual knobs to control volume, Play/Pause, Bluetooth, and other functions and has the ability to add an optional matching right channel speaker for true stereo

sound. It has a visual display of time and alarm function. It is powered by a 100-240V external adapter and an optional battery pack for portability.

The SpeakEasy is compact measuring 9.4" H x 5" D x 4.9" W with anodized aluminum knobs and face plate. The alarm, which contains snooze feature, is set by voice command. It has an optical sensor to automatically adjust the backlight based on ambient light conditions. It has 4 Assistant white LEDs to indicate when it is "thinking" and a battery icon to indicate when the battery is being charged.

"Today people of all ages have active lifestyles and want the ability to not only better control and organize their life, but to have access to great-sounding music from several sources playing through one device," adds Tom DeVesto.

SpeakEasy comes with a 1 x 3" custom 4-layer voice coil woofer, and 1 x ¾" dome tweeter. The tuned rear bass port provides for efficient bass response and extended range, it also doubles as a convenient carry handle for portability. Outputs are available for USB charging and the optional speaker for greater stereo separation.

SpeakEasy is suggested to retail for \$349 in walnut and \$399 in designer finishes of hickory, piano black, or piano white with a 2-year warranty. It will initially be offered through a Kickstarter campaign that begins immediately and will be at market beginning in October 2018.
